

## **Monarch Larva Monitoring Project (MLMP) Indiana Workshops and Sessions 2008**

Conducted by Ann Richardson and Robert Richardson, Regional MLMP Trainers

*These trainings are sponsored in part by Indiana Project  
WILD, Indiana Department of Natural Resources.*

---

### ***Monarchs, Monitoring, Milkweed and Migration!***

Hands-on training for anyone interested in monarch butterflies or monarch monitoring projects for home, schools or parks. Learn about the life cycle of an individual monarch traveling from Indiana to the mountains of Mexico and back to the United States, highlighting the threats to this migration phenomenon. Using live monarch eggs, larvae and adults, identify all stages of a monarch's life cycle and tag adult butterflies. Develop strategies for creating Monarch Waystations and experiment with monarch curriculum for grades K-8. Conducted by Ann Richardson and Robert Richardson, Regional Trainers for the Monarch Larva Monitoring Project, a citizen science project developed at the University of Minnesota. Sponsored by Indiana Project WILD, Indiana Department of Natural Resources. CRUs available.

**To register for any of these workshops, contact Marie at the Natural Resources  
Education Center at (317) 562-1338 or at [nrec@dnr.in.gov](mailto:nrec@dnr.in.gov)**
